The Eucalyptus Tree

Eucalypt

There is only one Eucalyptus tree in Ten Acre Woods but it really stands out. It is a beautifully fragrant tree and full of rich oil that attracts attracts bees and other pollinating insects. The leaves have a high level of essential oils which are difficult for most animals to process.

While it is not native to the UK this tree has **naturalised** in Ten Acres.

The Eucalypt fairy is afraid of fire, as the oil in the Eucalypt tree is highly flammable, so always make sure you keep fires away from her tree.
