

**TWIG
HUNT**
(Tree ID)

This activity is best undertaken during AUTUMN and WINTER. This is a more advanced learning activity for identifying trees without leaves on!

SAFETY

Make sure you pack some water for the walk.

Check the weather - don't walk in the forest if it's windy!

Wear clothes with long sleeves and legs to protect from bug bites.

Take a walk to your local woodland. Ten Acres has a re-wilded section from Cartland Road with a path running through it.

Stick to the path. If it's a big forest - tell someone where you are going.

HOW TO DO IT

It's really easy to start learning tree identification! Find the twigs on the next page on your walk and see if you can remember what they look like on your next walk!

Look at twig colour, shape and buds.

Draw them, create a nature journal, test your knowledge and keep practicing.

The way we identify trees changes in different seasons, you'll need our leaf identifier sheet for summer/spring.

All of these trees can be found on the Ten Acres site

OAK TREE

Draw your twig here!

BIRCH TREE

Draw your twig here!

ROWAN TREE

Draw your twig here!

WILLOW TREE

Draw your twig here!

HAWTHORN TREE

Draw your twig here!

HAZEL TREE
